FUNCTION: THROMBIN INHIBITOR ACTIVATED BY THE GLYCOSAMINOGLYCANS, FUNCTION: THROMBIN INHIBITOR ACTIVATED BY THE GLYCOSAMINOGLYCANS, HEPARIN OR DERMATAN SULFATE. IN THE PRESENCE OF THE LATTER, HC-II BECOMES THE PREDOMINANT THROMBIN INHIBITOR IN PLACE OF ANTITHROMBIN III (AT), ALSO INHIBITS CHYMOTRYPSIN, BUT IN A GLYCOSAMINOGLYCAN-INDEPENDENT MANNER.

FUNCTION: PEPTIDES AT THE N-TERMINAL OF HC-II HAVE CHEMOTACTIC ACTIVITY FOR BOTH MONOCYTES AND NEUTROPHILS.

TISSUE SPECIFICITY: EXPRESSED PREGOMINANTLY IN LIVER.

TISSUE SPECIFICITY: EXPRESSED THROMBIN INHIBITION.

DOMAIN: THE N-TERMINAL ACIDIC REPEAT REGION MEDIATES, IN PART, THE GLYCOSAMINOGLYCAN-ACCELERATED THROMBIN INHIBITION.

DISBASE: DEFECTS IN SERPINDI ARE ASSOCIATED WITH THROMBOSIS

FUNCTION: SELF-INCOMPATIBILITY (SI) IS THE INHERITED ABILITY OF A FLOWERING PLANT TO PREVENT SELF-FERTILIZATION BY DISCRIMINATING BETWEEN SELF AND NON-SELF POLLEN DURING POLLINATION. IN MANY SPECIES OF THE SOLANACEAE, SELF-INCOMPATIBILITY IS CONTROLLED BY THE SINGLE, MULTIALLELIC LOCUS S: THIS STYLAR GLYCOPROTEIN IS ASSOCIATED WITH EXPRESSION OF SELF-INCOMPATIBILITY IN POTATO. CATALYTIC ACTIVITY: Two-stage endonucleolytic cleavage to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       1064

    Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 BB BB
